

Offordum Michael Chidubem

Django Backend Developer | Iot & Embedded Systems Engineer

Lagos, Nigeria | +234 903 720 7068 | michaelboss500@gmail.com |
[linkedin.com/in/michael-offordum-3057a6240](https://www.linkedin.com/in/michael-offordum-3057a6240) | **GitHub:** <https://github.com/anon4K>

Backend-focused software developer with hands-on experience building scalable Django applications and integrating backend systems with IoT and embedded devices. Strong foundation in Python, RESTful API design, and embedded systems development. Experienced in freelancing backend development projects and building intelligent systems that combine software and hardware. Passionate about building secure, efficient, and production-ready backend systems that power real-world applications.

CORE COMPETENCIES & TECHNICAL SKILLS

- Django Backend Development
- RESTful API Design & Integration
- Python Application Development
- IoT Systems Integration
- Embedded Systems Programming (Arduino)
- Database Design & Management (SQL)
- Backend Architecture & System Design
- AI & Machine Learning Integration
- Debugging, Testing & Performance Optimization
- Version Control (Git & GitHub)

TECHNICAL STACK

- **Languages:** Python, JavaScript, Java
- **Backend Framework:** Django
- **Frontend (Basic):** HTML, CSS
- **Embedded Systems:** Arduino Programming, Microcontroller Integration
- **Databases:** Relational Database Concepts (MySQL/PostgreSQL)
- **Tools:** Git, GitHub, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

BACKEND DEVELOPER (FREELANCE)

Sep 2024 – Dec 2025

Poctova – Lagos, Nigeria

- Developed and maintained backend systems using Django.
- Designed and implemented RESTful APIs for web applications.
- Built scalable server-side logic to support frontend and third-party integrations.
- Structured and optimized databases for performance and reliability.

- Implemented authentication and data validation mechanisms.
- Collaborated with frontend developers to ensure seamless API consumption.
- Debugged and resolved backend performance bottlenecks.
- Deployed and maintained backend applications in production environments.

ROBOTICS & AI ASSISTANT

May 2024 – Aug 2024

SOAIR AFRICA – Lagos, Nigeria

- Assisted the head of Robotics and AI in developing and implementing robotics and AI curricula
- Supported AI-based system development and practical robotics sessions.
- Maintained robotics hardware and embedded systems for hands-on labs.
- Troubleshoot AI and robotics implementation issues.
- Contributed research on emerging AI technologies.

2D GAME DEVELOPER

Aug 2020 - Sept 2020

Centre For Technology – Lagos, Nigeria

- Developed and implemented 2D game projects, focusing on user-friendly designs and code structure.
- Supported the Chief Engineer in managing and overseeing the completion and functionality of game development and robotics projects.
- Collaborated with the engineering team to ensure all projects were successfully delivered and aligned.

PYTHON INSTRUCTOR (PART-TIME)

Sep 2019 – Oct 2024

SMART HUB ACADEMY – Lagos, Nigeria

- Delivered Python programming training from foundational to advanced levels.
- Guided students in robotics and embedded system projects.
- Mentored learners in backend logic development and problem-solving.
- Supervised practical IoT-based project implementations.

PROJECTS

Fleet Management System: Built a fleet management system to track police cars in-house. This was a school project and it was built using Java.

View here: <https://github.com/anon4K/Fleet-Management-System>

GUI: Built a simple chatbot GUI using 100% Python.

View here: <https://github.com/anon4K/chatbot>

Other Projects: <https://github.com/anon4K>

EDUCATION

Bachelor of Science (B.Sc.) in Computer Sciences

2018 – 2025

University of Lagos
